

Knight Armor™

MATERIAL DESCRIPTION

Roll Weight	16 OZ/YD² or 24 OZ/YD²
Roll Width	48" & 60"
Temperature Resistance	3000°F
Standard Color	Black
Content	Carbonized Acrylic Felt
Chemical Family	Oxidized/Stabilized Polyacrylonitrile Fiber
After Flame Time	Less than 1 sec. (Average over test samples)
Char. Length	1/8" (Average over test samples)
Use	Meets ANSI FM4950 approved. Excellent for Welding Applications.

Meets or exceeds NFPA 701 Specification for materials that withstand high temperature without supporting combustion. Other: Material should be tested for its suitability in any application. Users should also familiarize themselves with the MSDS before handling.

** Results above reflect typical performance characteristics of the product listed. This document should not be used as certification to any specification.*
