

STEEL SCRIM VINYL SAFETY PRODUCTS

We set ourselves a daunting task: To create a vinyl that...

- *boasts an R-value of 1.14 or higher, high enough to guarantee you energy savings*
- *meet the strictest of codes for flame resistance including CFM, NFPA-701 and ASTM E-84 class 1 protecting you from fines*
- *protect against mildew, harmful chemicals and UV rays*
- *protect against heat up to 200 degrees*
- *provide cold crack resistance down to -20 degrees*
- *provide the highest tensile and tear strength on the market*
- *and, of course, be affordable enough to give you an attractive ROI*

Not an easy task. And all the ultra-strong vinyls we could find were prohibitively expensive...so we had to create...

Something Completely Unique.

Our engineers developed a tri-lateral (three-directional) polyester scrim design. It may look odd compared to traditional vinyl patterns, but it was **cost-effective** and, most importantly, boosted the tensile strength of the vinyl to over 406 pounds per square inch!

That's more than EIGHTY-FOUR PERCENT stronger than a standard 9x9 denier 1000 row scrim!

Finally, not only did we surpass all the requirements we set for your vinyl, we are so confident in our construction methods (see below) that we offer an industry-leading FIVE YEAR GUARANTEE on the construction.

The bottom line is you get the best vinyl available, save thousands on

energy, avoid costly fines...and get a fast return on your investment.

How fast?

Go to <http://steelguardsafety.com/industrial-curtains-page2.htm> today and use our **Cost Calculator** to estimate how much you could save on **next month's energy bill** with STEEL-GUARD's Steel Scrim Products controlling temperatures in your warehouse.

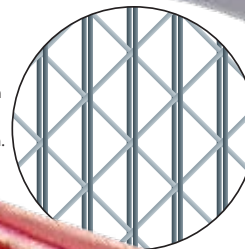

STEEL-SCRIM® VINYL

Weight: 16oz. sq.yd.

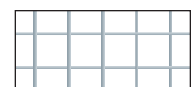

Polyvinyl Chloride (PVC)

Scrim

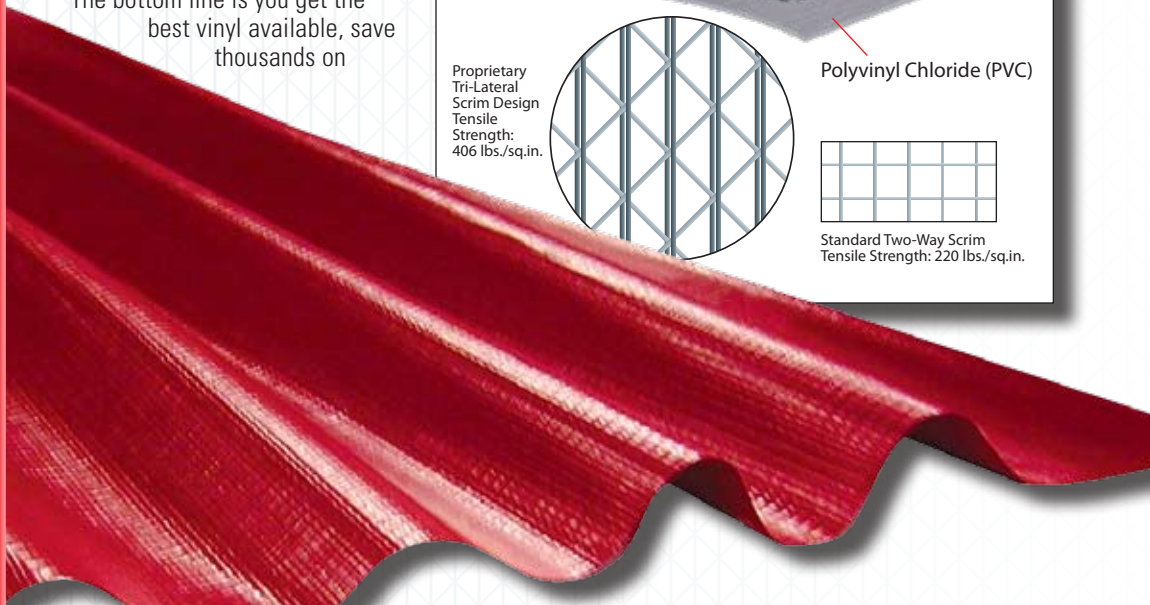

Proprietary Tri-Lateral Scrim Design
Tensile Strength: 406 lbs./sq.in.

Polyvinyl Chloride (PVC)

Standard Two-Way Scrim
Tensile Strength: 220 lbs./sq.in.

PRODUCT OPTIONS AND SPECIFICATIONS

INDUSTRIAL CURTAINS

Industrial curtains from Steel Guard Safety are the ideal solution for dividing and separating spaces in your facility.

SAVINGS: Industrial curtain walls may save you thousands per month on heating and cooling costs by separating unused building areas from temperature-controlled spaces.

PROTECTION: Industrial curtains protect your staff and property from:

- Dust and airborne particulates
- Paint overspray
- Water or chemical spray
- Grinding sparks
- Noise from machinery or industrial processes

Track mounted curtain walls open and close in seconds and come in any size to meet your exact space-dividing requirements.

BUCKLE-PROOF DESIGN

Square, tube design keeps the frame from buckling or twisting, resulting in a longer life and lower cost for you.

Available in 8 different sizes, 6 semi-transparent colors and our premium blue opaque 16 oz Steel Scrim Vinyl.

WELDING CURTAINS

Extreme Heavy-Duty Steel Scrim™ Vinyl protects your workers from

- Welding arc
- Flash burns
- UV light

...and protects your company from OSHA fines

Built for your most demanding applications, this 16-ounce vinyl out-performs standard 26-ounce vinyl! Meets fire codes standards that the other vinyls can't touch and gives you the toughest protection on the market.

CUSTOM COVERS

Stop Harmful Damage to Your Equipment and Save Money at the Same Time.

Dust, dirt, and oil causing production problems and even accidents in your plant? Not to mention costly repairs on malfunctioning machinery?

Here's your simple, cost-effective solution: Tough-as-nails vinyl covers protect machines

& equipment, protect employees, and prevent productivity losses... safeguarding your bottom line.
